The Theoretical Computer Science paper [1] is a follow-up to the paper [2], the authors' "budget" (or, in the original, do not use capital letters).

This is the first time that a study has been published that has examined the impact of the 2008 financial crisis on the health of the UK population. The study found that the health of the UK population has deteriorated since 2008, with a significant increase in the prevalence of mental health problems and a decrease in the prevalence of physical health problems. The study also found that the health of the UK population has deteriorated since 2008, with a significant increase in the prevalence of mental health problems and a decrease in the prevalence of physical health problems.
